Using Moodle

Student 1
All of our lecture notes are on Moodle. Erm, anything the lecturer mentions such as a... if they find an article interesting, erm, they'll put that they'll put a link to that on Moodle. All our supervision questions are on Moodle. Erm, and any, like, datasets so because we do stats, erm, we use a software called Stata and they'll teach you that when you get here. But, erm, all of the datasets you need for that are on Moodle. There's, erm, if if you if you don't know how to use Stata they have a lot of resources to help you learn on Moodle. Er, every everything you'll need is on Moodle except the, er, sources for your supervisions, which you can find on iDiscover.

Student 2
So we use Moodle quite a lot in Computer Science. A lot of our programming assignments are set via Moodle. So you'll have the instructions and often access to the lecture notes, too, so you've got those available.
