Managing your workload

Student 1

I think I've definitely learned to be more efficient with my work because the Cambridge, the way Cambridge sets work you can't really afford to be, I think, it's very easy to fall behind when you don't need to, so sort of, I think, being able to read things quicker while getting the essence of it, writing essays succinctly, not using lots of fancy language which isn't necessary and just trying to get through things as quickly but effectively as possible is something you pick up here quite quickly and I think people worried about the workload, um, shouldn't necessarily be because I think you learn very quickly how to manage it.

Student 2

And I remember being very nervous that I wouldn’t be able to cope with the workload and you know there are a lot of stereotypes going round about how, how much work gets puts on you, how difficult it is, but actually it's just all been a great relief that that is not true you still very much have time, ur, for a life and the work itself is so enjoyable when you’re really into your subject that it doesn’t even feel that like work sometimes, it’s, it’s, you’re thinking, you’re having discussions with your classmates and, um, it’s very friendly.
