Reading Lists Online

Browsing a list

Course lists can be long and it may be difficult to find what you need. One way to make it easier to find relevant resources is to toggle between the ‘Expanded’ and ‘Section’ view. This is determined by your lecturer. It may be by theme or by lecture title but it lets you see a subset of resources. Click on the ‘Toggle’ button again to close each section. Alternatively, you may wish to see more information at one time. For this you can use the ‘Compact view’. Click on the title of a particular theme or lecture and then click on ‘Compact view’. This reduces the size of the cover image, increasing the size for details of books and more information, as does collapsing the right-hand menu. To switch back, click on ‘Expanded’ view.
